High performance RIP for iPF series printers

PosterJet 8 is an intelligent printing solution for all Canon Large Format Printers. As one of the fastest and most productive RIPs on the market, PosterJet combines ease of use with exceptional output quality. State of the art client/server architecture ensures PosterJet is reliable, as well as adaptable to every professional workflow.

SimuPrint™

This new PosterJet technology enables you to print a number of different or identical jobs on up to five Large Format Printers at the same time. Especially print service providers benefit strongly from the enhanced productivity when printing to multiple printers.

High quality output

PosterJet's professional colour management offers excellent output quality and maximum gamut across all media. The PosterJet Live Update Service offers the latest media profiles for a wide selection of genuine Canon and 3rd party media.

InstantPrint™

Guarantees printing to commence within seconds, irrespective of file size, file format or PostScript complexity. This unique line-by-line printing technology ensures you use your time productively while you are able to control the output within seconds after job submission.

Unrivalled usability

PosterJet offers easy, error-free production. Simplicity comes courtesy of an intuitive user interface, automated workflow features, bi-directional printer information and a sophisticated error management system. In addition, all job settings are displayed in a highly sophisticated print preview that shows exactly what the print is going to look like. PosterJet works with the real What You See Is What You Get!

Compatible to
any current
Windows OS
(32Bit + 64Bit)

Future-proof via sophisticated plug-in technology

Expandable PDF- and with optional modules PostScript support

HPGL/2 HP-RTL support Job submission via Client, PPD or Hot Folder Unlimited printing length

- Save media with PosterJet's elaborated onboard nesting feature
- Save money by printing on up to five printers simultaneously from a single PC
- Save time with PosterJet's unique InstantPrint line-by-line technology

System requirements: CPU: Pentium IV, 3 GHz. Memory: 2 GB RAM. Hard disc: 40 GB available. DVD-ROM drive, 100 MBit Network card / USB 2.0, Operating Systems: Microsoft Windows* XP SP3, Vista, 7, 8, Server 2003, Server 2008, Server 2012, Mac OS 10.4 (Client only).

c24 / c24 PS

Supports all Canon large format printers with up to 24" (610 mm) printing width

c44 / c44 PS

Supports all Canon large format printers with up to 44" (1118 mm) printing width

c60+/c60+PS

Supports all Canon large format printers and provides extended functionality

Ideal for:

- Photographer and photo retailer
- Artists and Museum
- Retail and corporates
- Architects and Cartographer
- Public authorities, Institute
- Universities
- Advertising agencies and designer
- Booth builder and print service provider
- Military, and many more.
